

WorleyParsons Picks Autodesk for Major Multi-Country Deal

September 20, 2011

Leading Global Professional Services Firm Selects Autodesk for Enhanced 3D Design Solutions

SAN RAFAEL, Calif., Sep 20, 2011 (BUSINESS WIRE) --

Autodesk (NASDAQ:ADSK), a world leader in 3D design, engineering and entertainment software, announced the signing of an extensive enterprise licensing agreement for Autodesk software and services with WorleyParsons, a leading global firm serving the infrastructure, power and natural resource business sectors. The contract value is Autodesk's largest win to date in the Asia Pacific region.

The terms of the agreement provide WorleyParsons and its subsidiaries with access to 22 Autodesk software products around the world. Autodesk Consulting will also work closely with WorleyParsons to efficiently integrate the technology.

This new agreement extends the relationship WorleyParsons has had with Autodesk for some time. The company has used Autodesk's products extensively in past projects and intends to continue to do so in the future.

Autodesk software enables WorleyParsons to implement more streamlined design and construction processes for customers in the infrastructure, environment, and energy resources and minerals industries globally. WorleyParsons' engineers, designers, drafters and project managers will have greater access to a broad range of Autodesk software products, including <u>Autodesk Navisworks</u> software products, <u>AutoCAD Plant 3D</u>, <u>AutoCAD Civil 3D</u>, <u>Autodesk Revit Architecture</u>, <u>Autodesk Revit Structure</u> and <u>Autodesk Revit MEP</u> software.

"We are pleased that WorleyParsons has selected Autodesk software as a critical part of building next-generation energy and infrastructure projects," said Andrew Cunningham, major account sales manager, Australia and New Zealand. "Autodesk is continuing to work closely with WorleyParsons and other Australian organizations to help them leverage their investments in 3D design technology and grow their competitive advantage globally."

About Autodesk

Autodesk, Inc. is a leader in 3D design, engineering and entertainment software. Customers across the manufacturing, architecture, building, construction, and media and entertainment industries -- including the last 16 Academy Award winners for Best Visual Effects -- use Autodesk software to design, visualize and simulate their ideas. Since its introduction of AutoCAD software in 1982, Autodesk continues to develop the broadest portfolio of state-of-the-art software for global markets.
