

Autodesk and TRIRIGA Team with Wynn Design & Development on Multi-Billion-Dollar Casino Resort in Las Vegas

February 28, 2002

SAN RAFAEL, Calif., Feb 28, 2002 (BUSINESS WIRE) --

Digital Design Environment to Streamline Project Development from Concept to Facility Management

Autodesk, Inc. (Nasdaq:ADSK), the world's leading design and digital content creation company, today announced that it has teamed with TRIRIGA INC. to provide Wynn Design & Development with a digital design data environment that will manage the development of Steve Wynn's multi-billion-dollar Le Reve hotel casino and resort planned for Las Vegas. TRIRIGA is a leading provider of business automation software for the hospitality, aerospace, and design/build industries.

The combination of Autodesk Architectural Desktop used with TRIRIGA Intelligent Business System (IBS) represents a major shift toward an intelligent design framework capable of streamlining all phases of a project's life cycle -- from concept to facility management.

Wynn Design will use Autodesk Architectural Desktop to manage all aspects of the design phase for the Le Reve project. Architectural Desktop uses intelligent architectural objects to create a virtual building model in which all information is dynamically linked and automatically updated to reflect the latest design changes. This model-based design intelligence can be extended throughout the asset life cycle, ensuring accuracy and reducing cycle time.

All design objects developed in Autodesk Architectural Desktop are seamlessly linked to TRIRIGA IBS, which will help Wynn drive all subsequent phases of development, construction, and procurement. Built on a unique Design to Operation (D2O) methodology, TRIRIGA IBS offers a centralized, web-based software platform and suite of integrated tools to automate and streamline all aspects of a design/build project, including specification management, cost estimating, and procurement.

"The integration between Autodesk Architectural Desktop and TRIRIGA IBS will provide a tremendous benefit to the Le Reve project," said Todd Nisbet, executive vice president of Wynn Design & Development. "By using these advanced technologies, the project teams will have the capability to leverage digital design data that will help significantly automate and streamline all aspects of the development process for this world-class, next-generation hotel casino and resort."

With TRIRIGA IBS, Wynn Design & Development can import information from Autodesk Architectural Desktop drawings at the object level and store it in its online knowledge base, which the entire project team can access -- centrally linking owners, designers, subcontractors, and suppliers. The Le Reve project includes more than 50 specialty design firms and about 200 subcontractors, along with the entire Wynn Design & Development team.

Wynn Development also uses Autodesk ProjectPoint, the company's online project collaboration service, to ensure that everyone involved in this project can communicate with each other and has instant access to the latest project documents and drawings.

"Steve Wynn's Le Reve project is a prototype for the future," said Phil Bernstein, FAIA, vice president of Autodesk's Building Industry Division. "It's a perfect demonstration of how building owners and developers are increasingly realizing the benefits of extending the value of digital design data beyond the design phase to construction and future facility operation and management."

About TRIRIGA INC.

Established in 2000, TRIRIGA INC. is a developer of web-based business automation software for the hospitality, aerospace, and design/build industries. The company's enterprise-class software platform, TRIRIGA Intelligent Business System (IBS), offers a suite of tools to significantly improve manufacturing, engineering, construction, procurement, and maintenance operations. The product has won a series of awards, including the A/E/C Systems Best Award, Best of Show from CADALYST magazine, and Editors' Choice from CADENCE magazine. Current TRIRIGA clients include Marnell Corrao Associates, Wynn Design & Development, and Aerospace Concepts. For more information, contact TRIRIGA at 702/932-4444, or visit www.tririga.com.

About Wynn Design & Development

Wynn Design & Development was created in June 2000 as the design and construction group of the Wynn Resorts group. The company handles the full-service design, development, and construction of the hotels and casinos under development by Wynn Resorts. Wynn Design & Development is a wholly owned subsidiary of the Wynn family of companies.

About Autodesk

Founded in 1982, Autodesk, Inc., is the world's leading design and digital media creation, management, and distribution company. The company serves a diverse portfolio of markets, including building design, geographic information systems, manufacturing, digital media, and wireless data services. By delivering tools that foster innovation and creativity, Autodesk helps customers throughout the value chain leverage digital design data to work better, faster, and smarter. With annual revenues of \$936 million, Autodesk is one of the largest global software companies. For more information about the company, see www.autodesk.com.
