

Safe Harbor

Each of the presentations today will contain forward-looking statements about our strategies, products, future results, performance or achievements, financial, operational and otherwise, including statements about our strategic priorities, business model transition, and guidance for the second quarter and fiscal year 2021; total addressable market (TAM), our long term financial and operational goals; our M&A strategy; our capital allocation initiatives; and our stock repurchase program. These statements reflect management's current expectations, estimates and assumptions based on the information currently available to us. These forward-looking statements are not guarantees of future performance and involve significant risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from results, performance or achievements expressed or implied by the forward-looking statements contained in these presentations, such as a failure to maintain subscriptions, billings, revenue, deferred revenue, margins and cash flow growth; difficulty in predicting those financial and performance metrics; failure to maintain spend management; developments in the COVID-19 pandemic and the resulting impact on our business and operations, general market, political, economic, and business conditions, failure to successfully integrate acquisitions and manage transitions to new business models and markets, including our efforts to expand in construction and manufacturing, and attract customers to our cloud-based offerings; failure to successfully expand adoption of our products; and negative developments in worldwide economic, business or political conditions.

A discussion of factors that may affect future results is contained in our most recent Form 10-K and Form 10-Q filings available at www.sec.gov, including descriptions of the risk factors that may impact us and the forward-looking statements made in these presentations. The forward-looking statements made in these presentations are being made as of the time and date of their live presentation. If these presentations are reviewed after the time and date of their live presentation, even if subsequently made available by us, on our website or otherwise, these presentations may not contain current or accurate information. We disclaim any obligation to update or revise any forward-looking statement based on new information, future events or otherwise.

Non-GAAP Financial Measures

These presentations include certain non-GAAP financial measures. Please see the section entitled "Reconciliation of GAAP Financial Measures to non-GAAP Financial Measures" in the Appendices attached to the presentations for an explanation of management's use of these measures and a reconciliation of the most directly comparable GAAP financial measures.

125-135%
 REVENUE EXPANSION RATE
 Q1FY20-Q1FY21

The Revenue Expansion Rate measures the year-over-year change in annualized value of ACS subscription revenue for the population of customers that existed at the end of the fiscal period one year ago ("base customers"). Revenue Expansion Rate is calculated by dividing the annualized value of ACS subscription revenue as of the period end date related to base customers by the annualized subscription revenue from one year ago related to the same base customers. The calculation is based on USD, fluctuations caused by changes in foreign currency exchange rates and hedge gains or losses have not been eliminated. The Revenue Expansion Rate excludes revenue related to Assemble Systems and BIM 360 Enterprise Business Agreements. The Revenue Expansion Rate includes annualized value of subscription revenue for BIM 360 excluding Enterprise Business Agreements associated with BIM 360 usage, PlanGrid and BuildingConnected acquisitions from the respective company's legacy financial systems. The PlanGrid and BuildingConnected financial data, prior to the acquisition by Autodesk, are unaudited and were not subject to Autodesk's internal controls over financial reporting. Accordingly, the data collected from such financial systems may not be accurate or complete. As such, the information presented is intended to convey an approximate indication of the trends, direction and magnitude of the ACS revenue expansion rate and is not intended to be an estimate, approximation or prediction of, or substitute for, Autodesk's audited financial statements filed with the U.S. Securities and Exchange Commission. Autodesk does not anticipate continuing to disclose the Revenue Expansion Rate.

Project Management & Cost Enhancements

The screenshot displays a 'Cost Management' interface. At the top, there's a header with 'Main Contract - PA001'. Below it, a table lists various cost items with columns for 'Item', 'Status', 'Date', 'Amount', and 'Currency'. The table is organized into sections, likely representing different project phases or categories. On the right side, there's a sidebar with a 'Details' section for the selected contract, showing additional information and options.

The left screenshot shows a 'Project Management' dashboard. It features a 'Meeting Minutes' section with a list of meetings. The right screenshot shows a detailed view of a meeting minute document. It includes a 'Submittals' section with a list of items, each with a status and a date. The interface is clean and modern, with a clear navigation structure.

RFIs

- RFIs on Mobile
- RFI Permission Changes
- RFI to Potential Change Order
- Edit Closed RFIs
- Modify RFI Pushpins

SUBMITTALS

- Submittals on Mobile
- Item Based Submittal Workflow
- Contractual & Workflow Date Tracking
- Re-open/Edit Closed Submittals

COST MANAGEMENT

- Workflow Based Actions
- Pay Applications
- Fundamental Forecasting
- Email Integration

MEETINGS TOOLSET

- Easy Agenda & Meeting Minute Management
- Assign Individuals to Action Items
- Document Attachments to Meeting Records & Items
- Link Issues & RFIs to Meeting Items
- Advanced Text Editing

“The new tracking dates are a simple but powerful addition and pave the way to manage target dates and manage lead times. We are also very excited about the Meeting Minute module and being able to leverage them along with the Photo Module and create and manage Issues, RFI’s, Submittals, and keep connected with less email is absolutely awesome. Great progress overall.”

Andy Leek, Vice President, Technology & Innovation, Paric

- One of Atlanta's largest K-12 construction companies
- PlanGrid customer looking for specific RFI workflow
- PlanGrid worked with local channel partner with track record supporting BIM 360 project management workflows
- Together, demonstrated power of our Project Management workflows

Preconstruction Enhancements

The screenshot displays a software interface for preconstruction takeoff. It features a 2D plan view of a building with various areas highlighted in different colors. A table on the right lists takeoff items with their names and quantities. Below the table, there are buttons for 'Export takeoff' and '+ New takeoff item'. On the left, a file management panel shows a list of files under 'Client Files' and 'Internal Files'.

A large-scale construction site is shown in the background, featuring various pieces of heavy machinery such as excavators, cranes, and trucks. The site is filled with rebar and concrete structures, indicating a major infrastructure project. In the distance, a multi-story building and a bridge are visible under a clear blue sky.
